PROFILE

Talent acquisition leader with 15+ years scaling tech hiring across Europe and the US — three unicorns grown, from startup build-outs to Google. Equally at home owning a hiring function end-to-end and carrying the req load hands-on: sourcing, interviewing, closing. Treats recruiting as a systems problem — AI-native workflows, ATS architecture, and data-driven process design that let hiring scale without added headcount.

EXPERIENCE

DFINITY Foundation - Zurich, Switzerland

STAFF RECRUITER | caffeine.ai (DFINITY Spin-off) | January 2025 - July 2026

- Partnered directly with founders to define the hiring roadmap, comp benchmarks, and interview processes for a zero-to-one AI startup
- Built the full recruiting stack from scratch — ATS, sourcing channels, employer brand — with no agency support
- Competed for scarce AI/ML and SRE talent against big-tech offers, closing senior specialists including the CTO
- Applied LLM-based application tools (own build) to prioritize pipelines and speed up screening, interviewing, and selection

FREELANCE RECRUITER | June 2024 - December 2024

- Returned to DFINITY Foundation on a freelance basis to support recruitment needs
- Converted to internal Staff Recruiter after six months, at DFINITY's initiative

SENIOR RECRUITER | November 2021 – April 2023

- Contributed to 100 hires in 2022, specializing in Blockchain / Web3 R&D and supporting operational roles throughout Zurich and San Francisco
- Partnered with hiring managers, coached interviewers
- Sourced candidates, created outreach campaigns, and managed recruitment life-cycle, improved ATS and recruitment systems architecture
- Attended networking events and evaluated tools/services
- Developed and implemented diversity and inclusion hiring strategies
- Fostered strong relationships with universities and research institutions for talent pipeline

PROJECTS

Caffeine TA OS

(ATS/CRM, AI Note-Takers, Self-Built MCPs)

Automated Screening Pipelines

(Claude, Custom Built)

Application Analytics using LLMs

Everything ATS

(Migration, Config, Admin, Digital Offers — Greenhouse, Lever, GEM, Jazz)
